WORK EXPERIENCE

GLOBANT
WEB UI DEVELOPER
June 2019 - September 2023 (4 years 4 months).

Full-stack web development, application support, and user management platforms.

UI design and development following custom models, with a focus on building responsive, interactive designs adhering to web accessibility guidelines.

Implementing and maintaining scalable and performant Angular-based frontends, utilizing web technologies and agile methodologies with distributed teams globally.

APIs interacting, conducting research for new development solutions, and contributing to collaborative software development. Providing support in application development and bug-fixing.

At Globant, I had the privilege of serving esteemed global enterprises, including leading firms such as EY and PwC.

I crafted innovative, bespoke solutions tailored to meet their unique needs, contributing to their business success in a dynamic and competitive landscape.

ACCENTURE
DATA ENGINEERING ANALYST
June 2018 - June 2019 (1 year 1 month).

I played a key role in the development, implementation, and maintenance of applications, employing agile methodologies and collaborating closely with globally distributed teams.

My tasks included optimizing databases with large data volumes and tailoring stored procedures.

LANGUAGES

SPANISH:
Native.

ENGLISH
Full Professional Proficiency.

ITALIAN
Professional Proficiency.

COURSES AND CERTIFICATIONS

UDEMY
Creativity, Design Thinking, and Innovation for Business.
July 2021.

UDEMY
Power BI A-Z: Hands-On Power BI Training for Data Science.
June 2021.

UDEMY
Node.js API Masterclass with Express & MongoDB.
January 2021.

UDEMY
Angular: The complete guide.
December 2020.

FULLSOLUTIONS
Front-end Angular/React.
May 2019.

SKILLS

Typescript - Javascript
Angular **-** React - Wordpress
Figma - UX/UI Design
Flexbox - Grid
Css/Scss – Sass - Less
Bootstrap - Material - Tailwind

I showcased strong analytical skills in dissecting project requirements, resulting in the creation of web applications with interactive interfaces and responsive designs, thus enhancing user experiences.

Furthermore, I led initiatives to improve performance across various areas, including software architecture, APIs, and web services.

MUNDOIT
IMPLEMENTATION ANALYST
June 2016 - November 2017 (1 year 6 months)

Specialized in programming, development, and technical support for applications utilizing web technologies.

Conducted thorough functional analyses to understand requirements. Oversaw the normalization of complex data, managed database migrations, and handled modifications and maintenance.

SUPERINTENDENCIA DE RIESGOS DEL TRABAJO (MTESS)
FULLSTACK DEVELOPER
May 2014 - April 2016 (2 years)

I played a central role in the entire lifecycle of project, from analysis and design to programming, modification, and testing of application, user interfaces, ABM, widgets, statistics and documentation.

Additionally, I standardized complex information, managed databases, and developed calculation procedures.

I handled platform administration, user permissions, and roles. Notably, I showcased my capacity to initiate projects from inception, exemplified by leading the development of a nationwide software solution for statistical analysis and issue tracking in the workplace.

IRSA CORPORATION
SYSADMIN
August 2011 - September 2013 (2 years 2 months)

I managed the installation, maintenance, configuration, and control of workstations and devices, including hardware enhancements.

Additionally, I administered applications and user accounts for shopping centers, overseeing system implementations across

Mobile / Responsive Design
Unit Testing
